Issue/Concern

Non-Functional Automatic Doors in Rodda Hall

Describe the issue/concern:

Dear Operations Team,

My name is Hirdeyjeet Singh, and I am the Secretary of Technology for the student senate. I am reaching out regarding an issue with the automatic doors in Rodda Halls that has been impacting disabled students' access to the building. Some of the doors don't work at all or some stop functioning certain times

Could you please provide an update on the status of these doors and any timeline for repairs? Ensuring accessibility is a high priority for our community, and addressing this issue would make a significant positive difference.

Thank you for your attention to this matter.

What do you recommend or suggest solving this issue/concern?

To address this concern, I recommend conducting a thorough assessment of all automatic doors in Rodda Halls to identify the specific issues and providing a clear timeline for repairs. Collaborating with the campus disability services office can ensure accessibility standards are met, and implementing a regular maintenance schedule can help prevent future issues. Additionally, setting up a feedback system for students to report door malfunctions and exploring interim solutions, like manual door assistance or clear signage, can make a significant difference while repairs are underway.

How will this recommendation support the success of SCC students and benefit the campus community?

This recommendation supports the success of SCC students and benefits the campus community by ensuring equitable access to essential campus facilities, particularly for disabled students. Addressing the issue of malfunctioning doors promotes inclusivity, removes barriers to education, and reinforces the college's commitment to fostering a welcoming environment for all students. By improving accessibility and streamlining maintenance processes, the campus becomes more efficient, safer, and better equipped to support a diverse student body. This proactive approach also enhances the sense of community and shared responsibility, positively impacting student morale and academic success.
