| Issue/Concern | Cloudy Water in Refill Station |
| Describe the issue/concern: | As I walked down the second floor of Rodda Hall North with my colleague Senator Jim Rico, he stopped to use the water bottle refill station. When the water came out, it was cloudy and white. I do not know what caused this, or what the cloudiness was, but it seems like a health issue to me. |
| What do you recommend or suggest solving this issue/concern? | Replacing the filter of the refill station on RHN second floor, fixing the pipes, or replacing the refill station unit |
| How will this recommendation support the success of SCC students and benefit the campus community? | It will allow students to drink water on that floor of the building. As they currently cannot drink that water. |
